SOFTWARE ENGINEER INTERN

Motivated and detail-oriented 3rd-year Bachelor of Technology (Hons) student in Information and Communication Technology(BT.Hons(ICT)) at Kotelawala Defence University. I have a strong understanding of SDLC principles, including Agile and Scrum methodologies, along with a solid foundation in Data Structures and Algorithms using Java. Skilled in full-stack web application development using frameworks such as Spring Boot, Django, Node.js, Flask, and FastAPI. Experienced in working with ORMs, relational databases, RESTful APIs, and WebSockets for real-time communication. Passionate about building efficient, scalable software solutions and continuously improving my technical expertise.

SKILLS

JAVA, PHP,Python, JavaScript, HTML,CSS, Django, Mysql, Postgres, Github, Postman, Linux, SpringBoot, FastApi, Node.js, Rest APIs, JWT, Flask, Graphic Design

PROJECTS

- CozyShell – Sea Turtle Hatchery Temperature Monitoring System
  Technologies : FrontEnd(Flutter), BackEnd(Node.js, Mysql)

CozyShell is an IoT-based temperature monitoring system designed to support sea turtle conservation by maintaining optimal incubation conditions in hatcheries. The system uses MicroPython-powered hardware components to continuously measure nest temperatures and transmit data to a Node.js backend. Real-time temperature updates are delivered to the frontend through WebSockets, while RESTful APIs are used for database operations and historical data storage. This solution enables conservationists to monitor and manage environmental conditions accurately and efficiently.

- Grocery Shop Management System
  Technologies : FrontEnd (React.js), BackEnd (Spring Boot, PostgreSQL)

Online platform for grocery store owners to manage inventory, sales, and billing in real-time

EDUCATION

Bachelor of Technology Honours in Information and Communication Technology — 2024 - Present

Sir John Kotelawala Defence University
